Consulting and Services

Our business offers consulting services and software solutions to companies across the country in manufacturing, distribution, insurance, human resources and more. While this may not be the time to heavily invest in your business, Virvent is here to support their neighboring Lake County businesses. If your company needs help with setting up emergency telecommuting, cloud hosting or any other short-term disaster solution, Virvent is here to help.

For March and April, we are offering local businesses a significantly deep discount on services to help them migrate their offices to the cloud or enable other necessary telecommute options to protect our businesses, employees and families. We are offering cloud-hosted environments at cost for small businesses through the months of March and April of 2020.

Migrating a small office environment to the cloud can be done in as little as 4-8 hours and provide centralized access to key business systems for your employees allowing them to stay home with children who are no longer in school, continue to perform services for your company and help keep your business operating. We can quickly migrate your local installation of Quickbooks or other software, along with your data, in a secure fashion to allow you to operate your business from anywhere. Our hosted solutions are backed by Amazon Cloud Services

In addition to cloud-hosting, we are offering our services for emergency preparedness for a deeply discounted rate. Our regular hourly fees for small businesses start at \$100 / hour. In response to the Covid-19 situation and to help us all get through this, we are discounting these fees to \$25 / hour for March and April. 20% of all local business service fees for March and April will be donated to non-profit organizations including the Northern Illinois Food Bank and A Safe Place in an effort to help those most in need.

We are #CommunityStrong
